

CANPOWER SKATE SESSION

This program is geared towards hockey and Ringette players. It is an instructional program developed by Skate Canada. Focus is on balance, power and agility. Instructors will teach skills, and instruct with circuits, and drills. Full hockey gear and a stick are required.

Testing is not part of this program.

As a guide, this program is generally geared for Novice players, up to and including Atom House, Atom B skaters and up to and including U12 Ringette players.

Pre-Power - This program is designed for players who cannot yet stop confidently with at least one foot and are working to get a consistent glide while skating backwards. This program will cover basic skating skills as required in hockey and ringette.

If your skater does not meet these criteria, the CanSkate program will be best suited for them.

Power - This program is designed for players who can consistently stop on one foot, and either consistently or most of the time on the other foot. Skaters should be able to get from one end of the ice to the other skating backwards with ease. This program will cover some basic and more refined skating skills in a faster paced setting that will translate easily to hockey or ringette.

If your skater does not meet these criteria, the Pre-Power Program will be best suited for them.

APPLICATION FORM Fall 2020

Please print

DSC Member in 2020 Winter season Yes __ No __

Please print your child's following information.

Skater's Name _____ Gender _____
